INTRODUCTION

Cover Letter

29 September 2026

To: The Procurement Manager / Supply Chain Representative

Subject: Introduction of EDUCORE as a construction, maintenance and infrastructure delivery partner

Dear Sir / Madam,

EDUCORE CONSTRUCTION GROUP is pleased to present this company profile for consideration by public-sector institutions, municipalities, commercial organisations, developers, education and healthcare institutions, and other organisations procuring construction and maintenance services.

Our approach is practical and delivery-focused. We aim to provide a single accountable point of coordination for building works, refurbishment, maintenance, site works and related construction requirements, supported by disciplined planning, clear communication, quotation control and documented project administration.

We understand that construction procurement requires more than a competitive price. Tendering entities require accurate scope interpretation, responsive communication, compliant documentation, realistic programmes, appropriate site controls and dependable close-out. EDUCORE is positioning its operating model around these requirements.

Our tender-facing documentation can be assembled around the requirements of the particular client and tender, including company registration information, tax documentation, B-BBEE supporting evidence, banking confirmation, proof of address, supplier information and applicable construction compliance documentation.

Where a tender requires a specific professional appointment, licence, CIDB grading, specialist trade registration, safety document or technical certification, the requirement is addressed through the applicable competent person, registered professional, specialist contractor or subcontractor arrangement.

We welcome the opportunity to register as a prospective contractor, respond to requests for quotation and participate in formal tender processes within our applicable scope and capability.

Yours faithfully,

Management

EDUCORE CONSTRUCTION GROUP

WHO WE ARE

Company Overview

EDUCORE CONSTRUCTION GROUP is a Johannesburg-based construction and project-delivery business focused on practical building, refurbishment, maintenance and related infrastructure requirements. We combine responsive client communication with structured quotation, procurement and project coordination.

Our operating philosophy is simple: understand the scope, plan the work, control the process, communicate clearly and close out properly.

Purpose

To deliver practical construction and maintenance solutions that help organisations create, improve, maintain and operate safe, functional and professional built environments.

Vision

To become a trusted South African construction partner recognised for disciplined project delivery, responsive service, responsible procurement and dependable workmanship.

Mission

To interpret client requirements accurately, coordinate appropriate resources and deliver construction and maintenance work with attention to quality, programme, cost, safety and documentation.

Operating Values

- **Reliability** — realistic commitments, clear communication and follow-through.
- **Responsiveness** — timely quotations, project updates and issue escalation.
- **Integrity** — transparent scope interpretation, pricing and documentation.
- **Quality** — fit-for-purpose workmanship and controlled project close-out.
- **Safety** — appropriate site controls and compliance with applicable requirements.
- **Continuous improvement** — learning from each project and strengthening delivery systems.

WHAT WE DO

Construction Services & Delivery Portfolio

EDUCORE's construction portfolio is structured around building, refurbishment, maintenance and related works. Exact scope, trade requirements, programme, materials and specialist appointments are confirmed at quotation or tender stage.

Service area	Typical scope
Building construction	General building works, extensions, alterations, structural and non-structural building components, finishes and associated site coordination.
Renovation & refurbishment	Schools, offices, facilities and occupied buildings requiring upgrades, repairs, alterations and modernisation.
Facilities maintenance	Planned and reactive maintenance, repairs, remedial works, painting, waterproofing, roofing and general building upkeep.
Civil & external works	Site preparation, paving, drainage-related works, boundary works and other external works within applicable scope.
Finishes & fit-out	Painting, ceilings, partitions, flooring, carpentry/joinery, doors and practical internal finishing works.
Trade coordination	Coordination of plumbing, electrical, specialist installations and other regulated trades through appropriately qualified/registered resources where required.
Tender & project support	Scope review, site information, quotations, procurement coordination, programme inputs, progress communication and close-out documentation.

Delivery principle

- Scope and specifications are reviewed before pricing.
- Material and workmanship requirements are confirmed against the approved scope.
- Substitutions or alternatives are identified for client approval where applicable.
- Specialist or regulated work is assigned to appropriately qualified resources where required.

CUSTOMER FOCUS

Markets & Project Environments

EDUCORE is positioned to support organisations that require responsive construction, refurbishment and maintenance coordination, particularly where procurement discipline and clear documentation are important.

- **Government departments & public entities** — construction, refurbishment and maintenance opportunities subject to applicable registration, grading and tender requirements.
- **Municipal & community infrastructure** — practical building and external works aligned to project scope.
- **Schools & education facilities** — classroom, administration, sanitation, maintenance, refurbishment and facility-improvement projects.
- **Healthcare & care environments** — maintenance, refurbishment and building-related works subject to site, safety and technical requirements.
- **Corporate & commercial facilities** — offices, retail, warehouses, business premises and operational facilities.
- **Property owners & developers** — renovations, fit-outs, maintenance and construction coordination.
- **Industrial & operational environments** — repairs, maintenance, external works and site-support requirements.
- **Community & non-profit organisations** — practical facility improvement and maintenance projects.

Why EDUCORE

- One accountable point of contact for construction and maintenance coordination.
- Structured quotations that support procurement review and approval.
- Practical scope interpretation and responsive communication.
- Tender-oriented document administration and compliance pack preparation.
- Flexible coordination of materials, trades and specialist resources.
- Johannesburg base with enquiries welcomed for projects across South Africa, subject to project requirements.

Commercial approach: We compete through disciplined delivery, responsive service, transparent scope management and fit-for-purpose construction solutions — not unsupported promises.

HOW WE WORK

Project Delivery Approach

1. Requirement review

Review drawings, scope, quantities, specifications, site information, programme and tender conditions where provided.

2. Site & scope confirmation

Clarify measurements, access, working conditions, interfaces, materials and client requirements.

3. Costing & formal quotation

Prepare a structured quotation or tender submission reflecting scope, exclusions, assumptions, programme inputs and applicable terms.

4. Planning & procurement

Confirm approved scope, procure materials and coordinate labour, plant, specialist trades and site requirements.

5. Site execution

Coordinate work against the agreed programme while maintaining communication, quality checks and appropriate site controls.

6. Progress & issue management

Track progress, communicate relevant changes or constraints and escalate issues through the designated client contact.

7. Inspection & close-out

Address snag items, complete agreed work, compile relevant close-out information and confirm completion.

Quality, Safety & Risk Controls

- Scope and specification checks before mobilisation.
- Approved quotation, tender scope or work instruction used as the commercial baseline.
- Material and workmanship checks appropriate to the project.
- Controlled handling of variations, substitutions and additional work.
- Site safety documentation and controls appropriate to the project and client requirements.
- Use of competent, appropriately qualified or registered resources for regulated specialist work.
- Documented handover, snagging and close-out where required.

Note: Site-specific health and safety, environmental, insurance, professional and specialist compliance requirements are addressed according to the tender, client and applicable legal requirements.

SUPPLIER INFORMATION

Business Particulars, Compliance & Tender Readiness

Business particular	Confirmed detail
Trading name	EDUCORE CONSTRUCTION GROUP
Company registration	2026/461572/07
Tax reference	9790884192
B-BBEE status	Level 1 — supporting proof to be provided with tender/vendor documentation as applicable.
Physical address	104 Donnelly Street, Turffontein, Johannesburg, 2190
Telephone / WhatsApp	071 945 0220
Email	info@educorestationery-hygiene-ppe.co.za
Website	www.educorestationery-hygiene-ppe.co.za
Supplier number	MAAA1735098

Tender & Vendor Documentation Pack

- Company registration documentation.
- Tax registration and current SARS tax-compliance documentation, where requested.
- B-BBEE supporting documentation applicable to the enterprise and tender.
- Bank-account confirmation letter.
- Proof of business address.
- Director / authorised representative information required for onboarding.
- CSD and supplier-registration information where required.
- CIDB registration, grade and class-of-works documentation where applicable to the tender.
- COID / Letter of Good Standing, insurance, health & safety files and other project-specific compliance documents where applicable.
- Relevant technical, supplier, product or specialist certificates required by the project.

Tender readiness note: Public-sector construction tenders may specify particular CIDB grades and classes of works. EDUCORE will align each submission to the actual tender requirements and provide the applicable supporting evidence. A CIDB grade or class is not stated in the source company profile and has therefore not been invented here.

CONTACT EDUCORE

Let's Build What Your Organisation Needs

Send us your project scope, drawings, bill of quantities, specifications, site information, quantities, required completion date or tender reference. We will review the requirement and respond with clarification questions, a site assessment where appropriate, or a formal quotation/tender response within the applicable process.
